In US, after post Dot Com bubble burst, only two technology companies occupied the Top 10 position as per market capitalization. 2019 onwards, there were 7 tech companies, part of the list. And surprisingly, 6 are those which were not there in the original list at all! What is happening? Of course, we all did not have mobile phone then. Instead, we were using PCO phones with 1 Re coin to call. It is new wave; the Digital Wave. So, in this backdrop, what will be the future; 20 years down the line? The webinar will be addressing important upcoming technological trends compelling us to change in next two decades. Let's dream it together.
