Invitation for Webinar on The Pollution Mess dated 11-06-2022

IEEE Delhi Section with Computer Society Chapter, Consultants Network Affinity Group, Life Member Affinity Group, Inter Society Relations, Industry Relations & SIGHT Standing Committees of IEEE Delhi with the associations CSI, Safa Society, ISTE Delhi Section, IETE Delhi Centre, invites you for a Webinar on 11-June-2022, the Saturday, at 06:00 p.m.

Air pollution mess (enhanced in winters) in Delhi and NCR is well known ? due to the continued practice of stubble burning on over 6 million acres of farms in the regions around Delhi and NCR, impacting public health, farm health and our environment. The main barrier to India's stubble burning issue is not the lack of alternatives available but rather understanding the problem at the root level and choosing, mobilizing and implementing solutions that fit the purpose. In 2021, nurture.farm decided to deal with the issue of stubble burning by successfully deploying a bio-decomposer-based spraying solution on the farms, at a significant scale of over 4,00,000 acres, and through a deep science and tech based approach. Come, be part of the interactive discussion about what it takes to build and scale such solutions, and the kind of impact it has done to date - on the farm, on the environment, and in these local farming communities. This webinar is aimed to discuss its all round perspective.
