1. Vision of the Department

To become a Centre of excellence in the field of Computer Science and Applications, to contribute effectively in the rapidly changing global economy directed towards national development ensuring prosperity for the mankind.

2. Mission of the Department

- M1** To become a centre of excellence in the field of Computer Science and Applications and produce professionals as per global industry standards.
- M2** To foster innovation, entrepreneurial skills, research capabilities and bring all-round development amongst budding professionals.
- M3** To promote analytical and collaborative life-long learning skills, among students and faculty members involving all stakeholders.
- M4** To inculcate strong ethical values and professional behaviour while giving equal emphasis to social commitment and nation building.

3. Programme Educational Objectives (PEOs)

The PEO's for the MCA programme are as follows:

- PEO1** Exhibit professional competencies and knowledge for being a successful technocrat.
- PEO2** Adopt creative and innovative practices to solve real-life complex problems.
- PEO3** Be a lifelong learner and contribute effectively to the betterment of the society.
- PEO4** Be effective and inspiring leader for fellow professionals and face the challenges of the rapidly changing multi-dimensional, contemporary world.

4. Programme Outcomes (POs)

PO1: Computational Knowledge (CK)

Demonstrate competencies in fundamentals of computing, computing specialisation, mathematics, and domain knowledge suitable for the computing specialisation to the abstraction and conceptualisation of computing models from defined problems and requirements.

PO2: Problem Analysis (PA)

Identify, formulate, and analyze complex real-life problems in order to arrive at computationally viable conclusions using fundamentals of mathematics, computer sciences, management and relevant domain disciplines.

PO3: Design and Development of Solutions (DDS)

Design efficient solutions for complex, real-world problems to design systems, components or processes that meet the specifications with suitable consideration to public health, and safety, cultural, societal, and environmental considerations.

PO4: Conduct Investigations of Complex Computing Problems (CICP)

Ability to research, analyze and investigate complex computing problems through design of experiments, analysis and interpretation of data, and synthesis of the information to arrive at valid conclusions.

PO5: Modern Tool Usage (MTU)

Create, select, adapt and apply appropriate technologies and tools to a wide range of computational activities while understanding their limitations.

PO6: Professional Ethics (PE)

Ability to perform professional practices in an ethical way, keeping in mind cyber regulations & laws, responsibilities, and norms of professional computing practices.

PO7: Life-Long Learning (LLL)

Ability to engage in independent learning for continuous self-development

as a computing professional.

PO8: Project Management and Finance (PMF)

Ability to apply knowledge and understanding of the computing and management principles and apply these to one's own work, as a member and leader in a team, to manage projects in multidisciplinary environments.

PO9: Communication Efficacy (CE)

Ability to effectively communicate with the technical community, and with society at large, about complex computing activities by being able to understand and write effective reports, design documentation, make effective presentations, with the capability of giving and taking clear instructions.

PO10: Societal and Environmental Concern (SEC)

Ability to recognize and assess societal, environmental, health, safety, legal, and cultural issues within local and global contexts, and the consequential responsibilities applicable to professional computing practices.

PO11: Individual & Team Work (I&T)

Ability to work in multi-disciplinary team collaboration both as a member and leader as per need.

PO12: Innovation and Entrepreneurship (I&E)

Ability to apply innovation to track a suitable opportunity to create value and wealth for the betterment of the individual and society at large.

5. Institutional Policy for Students' Conduct

The following guidelines shall be followed:-

5.1 All the students in their introductory Lab. shall be assigned a system, which shall be their workplace for the complete semester. Students can store records of all their Lab. assignments on their individual workstations.

5.2 Introductory Lab. shall include an introduction to the appropriate software/tool, followed by a basic Introductory Assignment having Practice

- Questions. All the students are expected to complete this assignment within a week time, as the same shall be assessed through a lab. test.
- 5.3 Each week the instructor, in parallel to respective topics covered in the theory lecture, shall assign a set of practical problems to the students in form of Assignments (A, B, C,). The problems in these assignments shall be divided into two parts. The first set of Problems shall be compulsory for all the students and its record need to be maintained in the Practical File, having prescribed format, as given in Appendix-A. All the students should get the weekly assignment checked and signed in the Practical File by the respective teacher in the immediate succeeding week. The second set of problems are Advanced Problems and shall be optional. Student may solve these advanced problems for their further practice.
 - 5.4 Cellular phones, pagers, CD players, radios and similar devices are prohibited in the classrooms, laboratories and examination halls.
 - 5.5 Laptop-size computers / Tablets may be used in lectures for the purpose of taking notes or working on team-projects.
 - 5.6 The internal practical exam shall be conducted towards the end of the semester and shall include the complete set of Lab exercises conducted as syllabus. However, students shall be assessed on continuous basis through overall performances in regular lab. tests, both announced and surprise and viva-voce.
 - 5.7 The respective faculty shall prepare and submit sufficient number of practical sets of computing problems to the Dean (Examinations), atleast two weeks prior to the actual exam. It is the responsibility of the faculty to ensure that a set should not be repeated for more than 5 students in a given batch.
 - 5.8 The exam shall be of 3 hours duration where the student shall be expected to implement solutions to his/her assigned set of problems on appropriate software tools in the lab.

5.9 Once implemented, student shall also appropriately document code implemented in the assigned answer sheets, which shall be submitted at the end of the examination. All the students shall also appear for viva-voce examination during the exam.

5.10 Co-operate, Collaborate and Explore for the best individual learning outcomes but copying or entering into the act of plagiarism is strictly prohibited.

6. Learning Outcomes of Laboratory Work

The student shall demonstrate the ability to:

- ☑ Verify and Implement the concepts and theory learnt in class.
- ☑ Code and use Software Tools to solve problems and present their optimal solutions.
- ☑ Apply numerical/statistical formulas for solving problems/questions.
- ☑ Develop and apply critical thinking skills.
- ☑ Design and present Lab as well as project reports.
- ☑ Apply appropriate methods for the analysis of raw data.
- ☑ Perform logical troubleshooting as and when required.
- ☑ Work effectively as a member of a team in varying roles as need be.
- ☑ Communicate effectively, both oral and written.
- ☑ Cultivate ethics, social empathy, creativity and entrepreneurial mindset.

7. Course/Lab Outcomes (COs)

CO1 Translate an information model into a relational database schema and to implement the schema using RDBMS. (BTL2)

CO2 Apply advanced SQL features like views, indexes, synonyms, etc. for database (BTL3)

- CO3** Analyze PL/SQL structures like functions, procedures, cursors and triggers for database applications. (BTL4)
- CO4** Examine database administration concepts like GRANT, REVOKE etc. through SQL commands. (BTL4)
- CO5** Work in teams to design solutions for real world problems/case studies by creating efficient database schema.. (BTL6)

8. Mapping of COs with POs

Table 1: Mapping of COs with POs

PO/CO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	3	3	2	-	3	-	-	-	-	3	-	-
CO2	3	2	2	-	-	2	-	-	-	3	-	-
CO3	3	2	2	-	-	2	-	-	-	3	-	-
CO4	3	3	3	2	-	-	-	-	-	3	-	-
CO5	3	3	3	2	3	2	2	3	3	3	3	-

9. Course/Lab Description

- Course (Lab) Title** : Database Management Systems Lab.
- Course (Lab) Code** : MCA-165
- Credits** : 01
- Pre-requisites** : Elementary Maths (Sets, Relations)
Basic Data Structure Concepts
- Academic Session** : January to June
- Contact Hours/Week** : 02 (01 Lab of 02 hours each/Week)
- Internal Assessment** : 40 Marks
- External Assessment** : 60 Marks

10. Grading Policy

Item	Points	Marks	Remarks
Weekly Lab Assignments including Practical Files	10	10	Closed Book/Open Book
Internal End-Term Practical Examination	20	10	Closed Book
Viva-Voce	20	10	Closed Book
External End-Term Examinations	60	60	Closed Book (conducted and evaluated by the University)
Total		100	

11. Lesson Plan

Week No.	Lab No.	Topics / Concepts to be Covered	Reference of Lab Manual
1.	1.	Basic DDL/DML queries, views and sub-queries	Assignment A (Problem AP1)
2.	2.	Advanced SQL queries based on Constraints, Sequences, Indexes and Union, Intersect and Minus clauses	Assignment A (Problem AP2)
3.	3.	Joining tables in SQL for fetching desired records	Assignment B (Problem BP1)
4.	4.	Using Built-in functions	Assignment C (Problem CP1)
5.	5.	Buffer Reserved for Revision	Assignment A - C

6.	6.	Basic PL/SQL programs	Assignment D (Problem DP1 - DP3)
7.	7.	Transaction management - using savepoint, rollback and commit	Assignment D (Problem DP4 - DP5)
8.	8.	Implicit and Explicit cursors	Assignment E (Problem EP1- EP2)
9.	9.	Implicit and Explicit cursors with Exception handling	Assignment E (Problem EP3- EP4)
10.	10.	Buffer Reserved for Revision	Assignment D - E
11.	11.	Procedures and Functions	Assignment F (Problem FP1- FP4)
12.	12.	Before and After Triggers	Assignment G (Problem GP1- GP2)
13.	13.	Buffer Reserved for Revision	Assignment F - G

12. Assignments

Assignment Set: A

Objectives of the Assignment:

- To familiarize with DDL and DML commands.
- To access desired records from tables, using where clauses with different operators and using nested queries.
- To apply integrity constraints at table level and column level.

CO/BTL Covered: CO1/ BTL3

Problems:

AP1 Consider the following table:

Table : Book

Field Name	Data type	Size	Constraint
Book_Code	Varchar2	5	Primary key
ISBN No.	Varchar2	8	Not Null/
Book_Name	Varchar2	8	Unique
Publisher	Varchar2	6	
Price	Number	5,2	>=100
Author_Name	Varchar2	8	
Date_of_Launch	Date		

Write queries to perform the following:

1. Insert few records in it.
2. Increase the size of the Book_Name field to 10 characters.
3. Display the total price of all the books of "TMH" publishing house.
4. Display the details of all the books of author "Yashwant Kanetkar" and "Robert Lafore".
5. Delete all the books belonging to "PHI" publisher.
6. Update the price of books by 5% which belong to 'BPB' publishers.
7. Create a new table "Author" with author details such as author id (primary key), name of the author, subject, contact details, research area etc.
8. Insert records in it and display the records of those authors who have 'Web mining' as their research area.
9. Add a new column "Author_Id" in "Book" table and make it a foreign key on "author id" of "Author" table.
10. Update all the previous records of Book table to add information of author id (newly added column)
11. Display the records of the books where book name starts with 'C' or 'G' or 'K'.
12. Create a view for the user to access Book Code, Name and Price of books which are published by 'Pearson Education'.

AP2

Consider the following table:

Table : Student

Field Name	Data type	Size	Constraint
Roll_no	Number	2	Primary Key
Name	Varchar2	20	Not Null
Address	Varchar2	50	

City	Varchar2	30	
Marks_Sub1	Number	5,2	>=0 and <=100
Marks_sub2	Number	5,2	>=0 and <=100
Marks_sub3	Number	5,2	>=0 and <=100
Total	Number	5,2	>=0 and <=300

Write SQL queries for :

1. Insert few records except total marks.
2. Use Sequences for roll_no field.
3. Create a view on the table to access roll no, name (in capitals), Marks of all 3 subjects and Percentage of all the students.
4. Create a view on the table to access roll no, name and total marks of all the students.
5. Create a view on the table to access roll no, name and total marks of those students who belong to 'Delhi'.
6. Create a similar table 'Scholar' with same set of attributes.
7. Create a composite index on Student table.
8. Insert few records in 'Scholar' table.
9. Use 'union' to retrieve all records from both the tables.
10. Use 'intersect' to retrieve all uncommon records from both the tables.
11. Use 'minus' to retrieve records of one table which do not belong to other table.

Advanced Problems:

AA1 Consider the following table:

Table : Student

Field Name	Data type	Size	Constraint
Roll_no	Number	2	Primary Key
Name	Varchar2	20	Not Null
Address	Varchar2	50	
City	Varchar2	30	
Marks_Sub1	Number	5,2	>=0 and <=100
Marks_sub2	Number	5,2	>=0 and <=100
Marks_sub3	Number	5,2	>=0 and <=100
Total	Number	5,2	>=0 and <=300

Write SQL queries for :

1. Insert few records except total marks.
2. Create a view on the table to access roll no, name and total marks of those students who belong to 'Delhi'.
3. Calculate total marks of each student and save it.
4. Display the name of the student who has got the highest marks.
5. Display the records of those students who have got marks more than the marks of 'Kiran'.
6. Display the percentage of all the students with their names.
7. Display the names of those students who have got maximum marks in sub1 and more than 50 in sub2 and sub3.
8. Update the marks of all those students who are fail, with grace marks 5. (fail means less than 40)
9. Delete the record of student who got minimum marks.
10. Display record of student who got second highest marks.
11. Display the average *total* marks of all the students city wise excluding the students of 'Gurgaon'.
12. Get the names of students with Roll_no less than 30 and whose total marks is more than the total marks of at least one student with Roll_no greater than or equal to 30.

Assignment Set: B

Objectives of the Assignment:

- To work with joins for joining multiple tables.
- To apply and use primary key and foreign key concepts.

CO/BTLCovered: CO1 & CO2/BTL3 & BTL4

Problems:

BP1 Consider the following three relations:

*Primary Keys are indicated by #
Foreign Keys are underlined.*

Employee (Eid#, EName, Address, DateOfJoining, Department)
Project (Pid#, PName, StartDate, TerminationDate)
AssignedTo (Eid, Pid)

Now write queries for the following in relational algebra as well as in SQL:

1. Find the employees working on 'Banking' project.
2. Find the projects assigned to the employees of D01 or D02.
3. Find the employees who belong to Delhi and work on either 'University' project or 'ShareMarket' project
4. Find the employees who do not work on 'University' project.
5. Find the employees who work on all projects.
6. List the employees who have not been assigned any project.
7. Find the employees who joined the department after the commencement of 'Bank' project.
8. Display the start and termination date of projects which are allotted to 'Jai Prakash'.

Advanced Problems:

BA1 Consider the following relations:

*Primary Keys are indicated by #
Foreign Keys are underlined.*

Student (Roll#, SName, City, Age, Gender)
Course (Cid#, CName, Semester, Credits, Fee)
Enrollment (Roll, Cid, DateOfReg)

Now write SQL queries for the following:

1. Find the details of students registered in MCA course.
2. Display the total number of students enrolled in MBA.
3. Display the names of students who are enrolled in the course in which "Anita" is registered.
4. Display the names of all the students with their date of enrollment in the courses.
5. Display the name of the course in which "Kunal" is registered.
6. Display the names of boys-students enrolled in MCA.
7. Display the number of students registered in MCA course who live outside Delhi.

Assignment Set: C

Objectives of the Assignment:

- To familiarize with built-in functions including numeric, character and date functions.

CO/BTL Covered: CO2/ BTL4

Problems:

CP1 Consider any table of your choice and execute following functions on numeric, character and date type fields :

- sqrt()
- power()
- ceil()
- max()
- min()
- avg()
- count()
- exp()
- mod()
- sum ()
- floor()
- abs()
- greatest ()
- round()
- to_date()
- months_between()
- last_day()
- add_months()
- next_day()
- sysdate
- round()
- to_char()

- length()
- substr()
- lower()
- initcap()
- instr()
- concat()
- lpad()
- rpad()
- ltrim()
- rtrim()
- replace()

Assignment Set: D

Objectives of the Assignment:

- To familiarize with the structure of PL/SQL programs and learn basic concepts.
- To develop programs based on PL/SQL control structures.
- To apply transaction management using set of savepoint-rollback-commit statements.

CO/BTL Covered: CO3 & CO4/BTL3

Problems:

DP1 Write a PL/SQL code that will reverse a given number like 12345 to 54321.

DP2 Write a PL/SQL code to accept emp_id from user and display his / her record.

Table: Employee (EmpId, EName, DOJ, DOB, Salary, Address)

DP3 Write a PL/SQL code to calculate the area of a circle for a value of radius varying from 3 to 7. Store the radius and the corresponding values of calculated area in an empty table named Areas, consisting of two columns Radius and Area.

Table: Circle (Radius, Area, Circumference)

DP4 Write a PL/SQL code that first withdraws an amount of Rs. 1500 from an account. Then deposits an amount of Rs. 50,000 in another account. Update the current balance. Then check to see that the sum of the current balance of all the accounts in the bank

does not exceed Rs. 60,00,000. If the balance exceeds Rs 60,00,000 then undo the deposit just made.

Table : Accounts(AcCNo, Name, Balance, DateofOpening, DateofLastTransaction)

DP5 Write a PL/SQL code that accepts the account number from the user, check the users balance and updates date of last transaction. If it is greater than 1000, only then deduct Rs. 200/- from the balance, otherwise rollback the date of transaction to set it to the previous date. The process is fired on the Acct_Mstr table.

Table : Acct_Mstr(AcCNo, Name, Balance, DateofOpening, DateofLastTransaction)

Advanced Problems:

DA1 Write a PL/SQL code that gives 5% hike in basic salary to all employees. Then calculate the total sum of all salaries. If total salary is more than a fixed budget (inputted by user), rollback the entire updation.

Table : Employee(EmpId, EName, DOJ, DOB, Salary, Address)

DA2 Write a PL/SQL code that accepts roll number of a student from user, fetch his/her marks of three subjects in from the table, calculate his percentage and upate the same in the table.

Table : Stdudent(RollNo, SName, DOB, Sub1, Sub2, Sub3, Total, Percenatge, Grade)

DA3 Write a PL/SQL code that calculates factorial of first five even numbers and stores the same in the given table.

Table : Factorial (No, Fact)

Assignment Set: E

Objectives of the Assignment:

- To use implicit and explicit cursors for accessing multiple records from tables.
- To work with exception handling in PL/SQL programs.

CO/BTL Covered: CO3 & CO4/ BTL3

Problems:

EP1 The bank manager of Delhi branch decides to mark the status of all those accounts as *'Inactive'* on which there are no transactions performed in last 6 months. Whenever any such update takes place the corresponding record is inserted in another table

'InactiveAccounts' with the name and account no of the account holder and his balance.

Table : Account (AccNo, Name, Address, PANNo, Mobile, Status)

EP2 Write a PL/SQL code that updates the balance of the account holder of 'Delhi' branch and displays the number of records updated. (Use implicit cursor)

Table : Accounts(AcCNo, Name, Balance, DateofOpening, Branch)

EP3 Write a Cursor(PL/SQL code) to display the Employee_name, DateofBirth, Designation whose basic salary is greater than 15000, if not found then show the proper error message. (Use Exception handling)

Table : Employee(EmpId, EName, DOJ, DOB, Salary, Address)

EP4 Write a Cursor(PL/SQL code) to display the Book_Name, Author and Price of those books that belong to 'TMH' publisher. If no record found then show the proper error message. (Use Exception handling)

Table : Book(ISBN_No, BName, Publicaher, Author, Price)

Advanced Problems:

EA1 Write a PL/SQL code that updates the marks of all those students who are fail and then counts the number of records updated. (Use implicit cursor)

Table : Stduent(RollNo, SName, DOB, Sub1, Sub2, Sub3, Total, Percenatge, Grade)

EA2 Write a PL/SQL code that accepts the train no, source and destination from the user, finds the recods of the train in the given table. Display the record if record found otherwise display an appropriate message.

Table : Train (TrainNo, Name, Source, Destination, NoOfStops, NoOfCoaches)

Assignment Set: F

Objectives of the Assignment:

- To use the features of procedures and functions.

CO/BTL Covered: CO3/ BTL3

Problems:

FP1 Create a procedure that accepts the emp id from the calling procedure and displays

his/her record.

Table : Employee(EmpId, EName, DOJ, DOB, Salary, Address)

FP2 Create a function that accepts emp id from the calling procedure and returns his salary.

Table : Employee(EmpId, EName, DOJ, DOB, Salary, Address)

FP3 Write a PL/SQL function ODDEVEN to return value TRUE if the number passed to it is EVEN else will return FALSE.

FP4 Write a PL/SQL procedure called MULTI_TABLE that takes two numbers as parameter and displays the multiplication of the first parameter till the second parameter.

Advanced Problems:

FA1 Create a procedure that accepts the roll no from the calling procedure and fetch his marks of three subjects from the given table to calculate his percentage.

FA2 Create a function that accepts book id from the calling procedure, finds if it is a 'TMH' publication. If 'yes' then return its price.

FA3 Write a PL/SQL function 'Prime' to return true value if the number is prime else return false.

FA4 Write a PL/SQL procedure that accepts two numbers from a user and returns the larger number as INOUT parameters.

Assignment Set: G

Objectives of the Assignment:

- To develop triggers for some events such as insert, delete or update.
- To learn, use and differentiate before and after triggers.

CO/BTL Covered: CO3/ BTL3

Problems:

GP1 Create a Trigger in PL/SQL which will work before deletion or updation in employee_master table and inserts a duplicate copy of the record in another table for future reference.

Table : Employee_Master(EmpId, EName, DOJ, DOB, Salary, Address)

Emp_Backup (EmpId, EName, DOJ, DOB, Salary, DateofOperation)

GP2 Create a Trigger in P L/SQL which will work after update or insert on employee _master and store the old data and deleted data in a table named as backup_employee_master.

Table: Employee_Master(EmpId, EName, DOJ, DOB, Salary, Address)

Backup_employee_master (EmpId, EName, DOJ, DOB, Salary, DateofOperation)

Advanced Problems:

GA1 Given Student Report table, in which student marks assessment is recorded. In such schema, create a trigger so that the total and average of specified marks is automatically inserted whenever a record is insert.

Table : Stduent(RollNo, SName, DOB, Sub1, Sub2, Sub3, Total, Average, Grade)

GA2 To create a row level trigger for the CUSTOMERS table that would fire for INSERT or UPDATE or DELETE operations performed on the CUSTOMERS table. The trigger should display the difference in amount paid between the old values and new values.

Table: Customer (CustId, Cname, Address, OrderNo, AmountPaid, DateofPayment)

APPENDIX
