11:00 a.m. to 11:30 a.m. - Q & A Session followed by Certification

Registration **Link and Fee**

Registration Link: http://bvicam.ac.in/webinars/

No registration fee. It is absolutely free for the members of IEEE, CSI, IETE, ISTE, ISCA, IITP and Bharati Vidyapeeth, with pre-registration

Abstract of the **Talk**

The way governments operate and provide services to their residents has changed as a result of the growing interdependence between public administration and artificial intelligence (AI). The future directions and impacts of this connection between public administration and AI must be carefully considered as we stand on the threshold of a new age in government. The ethical, legal, and societal ramifications of AI in public administration are raised by this rapidly changing environment. To make sure that AI advances rather than hampers the primary goals of public administration, issues including data privacy, bias in AI algorithms, and the responsibility of automated systems must be carefully considered. In order to build a more effective, responsive, and fair government for all citizens, it is critical that we navigate this path with care and foresight. This expert discussion will focus exclusively on the future of public administration and AI promises both difficulties and opportunities.

All are welcome:

Please circulate this to all your interested colleagues, associates and friends. Please register in large numbers and derive maximum benefit. Advance registration is mandatory for participation. Participants will also get Participation Certificate.

(Prof. M. N. Hoda) Director, BVICAM, New Delhi
