Bharati Vidyapeeth New Delhi	IEEE Delhi Section with Computational Intelligence Society, Computer Society, Communication Society, Consultants Network Affinity Group, Life Members Affinity Group, Inter Society Relations, Industry Relations, TEMS, SMC, ES, CI, SIGHT Standing Committees of IEEE Delhi Section and Region-10 with following associations	IEEE Advancing Technology for Humanity — IEEE Delhi Section

CSI Delhi Chapter	IEEE COMPUTER SOCIETY Delhi Section Chapter	IITP New Delhi	IETE New Delhi	IEEE Computational Intelligence Society — IEEE Delhi Section

Invite you for a Free **Invited Talk** on **22-08-2023**, **the Tuesday,** at **03:00 p.m.** as per the details given hereunder:-

Speaker	**Prof. Mohamed Rawidean Mohd Kassim** Regional Coordinator, Region 10, IEEE Computer Society Professor at MIMOS, Malaysia.
Date and Time Schedule	**22-Aug--2023, the Tuesday,** from **03:00 p.m.** to **04:00 p.m.**
Title of the Talk	**The Application of Internet of Things (IoT) and Wireless Sensor Network (WSN) in Smart Agriculture**
Venue and Contact Details	**CISCO WebEx Meeting** Platform CISCO WebEx Event ID and Password shall be sent on E-Mail to the registered participants, at-least one day in advance. Please check your Spam and other folders also for our emails and mark it as SAFE / NOT SPAM.
Programme Schedule	**02:30 p.m.** to **03:00 p.m.** – **Login, online Networking and Tea (at Home)** **03:00 p.m.** to **04:00 p.m.** – **Technical Talk** **04:00 p.m.** to **04:30 p.m.** – **Q & A Session** followed by Certification
Registration Link and Fee	**Registration Link: http://bvicam.ac.in/webinars/** No registration fee. It is absolutely free for the members of IEEE, CSI, IETE, ISTE, ISCA, IITP and Bharati Vidyapeeth, with pre-registration
Abstract of the Talk	IoT and WSN technologies are widely used to build decision support systems to overcome many problems in the real world. One of the most interesting fields having an increasing need for decision support systems is Smart Agriculture (SA). This project presents WSN as the best way to solve the agricultural problems related to farming resources optimization, decision-making support, and land monitoring. This approach provides real-time information about the lands and crops that will help farmers make the right decisions. Using the basic principles of Internet and WSN technology, SA systems based on the IoT technology is explained in detail, especially on the hardware architecture, network architecture and software process control.

All are welcome:

Please circulate this to all your interested colleagues, associates and friends. Please register in large numbers and derive maximum benefit. **Advance registration is mandatory for participation. Participants will also get Participation Certificate.**
