**Abstract of the
Talk**

The economic, social, political and technological drivers show a stronger relationship between Information and Economy. There is going to be a sea change in the workplace, and workforce. The future enterprises have to devise a new generation HR policies to retain and sustain global Knowledge workforce. The green computing and the environmental protection and sustainable development assumes a greater significance. Latest development in the Internet of Things (IoT) demand a collaborative, cooperative and coexisting workforce for sustainable development. Creativity, Innovation and Productivity are the three major factors to be nurtured and practiced by the People, Enterprises and the Nation for sustainable growth. A new era of cognitive systems, where machines will learn, reason and engage with us in a more natural and personalized way. These innovations are being facilitated by the interconnection of technologies like Multi-hybrid cloud computing, AI and Virtual Reality, big data analytics and learning technologies (ML & DL), with the appropriate privacy and security considerations, for consumers, citizens, students and organizations for a better living on this Planet. The webinar is aimed to discuss all these challenging issues, which are facilitating all these massive changes, breaking the barriers and making the whole world as a Connected Village.

All are welcome:

Please circulate this to all your interested colleagues, associates and friends. Please register in large numbers and derive maximum benefit. **Advance registration is mandatory for participation. Participants will also get Participation Certificate.**
