**Abstract of the
Talk**

The webinar is aimed to discuss a high-level overview of Industry 4.0 and the related use cases and design techniques for the smart factory eco-system. The webinar also aims to deliberate, in detail, on important concepts like Digital Transformation, Leading Corporations, Emerging 5G and Industry 4.0, etc., their characteristics and related applications. With this webinar, the participants will get to understand about the digital transformation, killer use cases considered for various manufacturing plants, the related technologies, the hardware platforms and the various challenges that needs to be considered during the design/implementation stage.

All are welcome:

Please circulate this to all your interested colleagues, associates and friends. Please register in large numbers and derive maximum benefit. **Advance registration is mandatory for participation. Participants will also get Participation Certificate.**
