Abstract of the Talk

In the ever-evolving technology landscape, the field of web and mobile development is a dynamic and vital component of our digital landscape. Engineers strive to create immersive and effective online experiences for users around the world every year. In this session, we will delve into the world of web and mobile development, uncovering the latest development technologies and trends that are set to redefine the digital landscape in the coming years. In order to make applications reachable, it has become imperative to go mobile and have an app for promoting, selling and interacting with their customers. It is absolutely necessary for engineering leaders, teams and developers to use a cutting-edge techs and instrument to develop the next hit app, or to forever disappear into oblivion. The webinar will discuss on new trending technologies with its revolution, and how the engineers in the market are adapting with the new available frameworks. The webinar will also discuss its all-round perspective including the real-time issues and challenges.

All are welcome:

Please circulate this to all your interested colleagues, associates and friends. Please register in large numbers and derive maximum benefit. **Advance registration is mandatory for participation. Participants will also get Participation Certificate.**
